Experience

2018 - Date   System Software Developer – Baze University

I am responsible for the requirement gathering, project management, project leader (scrum master) for the organisation's development team, and project implementation and testing for all the organisation's software projects.

2019   System Software Developer | Al-Makkiya School Online

Gathered requirements, analyst and developed an E-Learning portal for the organisation where candidate can apply. Also, all the school activities are carried out on the platform (classes, lecture materials, chat room, assessment, etc.)
www.al-makkiya.com

2018   Software Developer | Network Engineer | – PTD Hotels

Managed the web application development and the networking teams for the hotel.

2017 - 2018   Program Analyst | IT Consultant – Broughton Trust, UK

Manages all IT services in the Company such as web design and development, database design and student management software.
www.broughtontrust.org.uk

2017   Mobile App | ShopMe, UK

Gathered requirements, analyst and developed a cross-platform mobile application for ShopMe where user can a store around him/her to buy items.

2016 - 2017   Team Member – Enterprise Kenya System

Enterprise Kenya is a project commissioned by the Kenyan Government ICT Authority. The software helps to match Kenyan technology innovators with potential investors. The project was executed using WordPress Content Management System. I spent 6 weeks working with practitioners from Competa IT bv, in The Hague, Netherlands to implement a portion of the site modelled on an online dating concept to match innovators and investors.

2016   Web Designer – Baze University (Baze University website version 3)

I designed and implemented the newly Baze University version 3 website. The website comprises of the following sub-system:
Course Finder.
Admin Panel.
Admission Application Portal.
www.bazeuniversity.edu.ng

2015   Mobile App – Baze University

I developed and maintain the organisation's android mobile application which can be found in the Google Play Store.

2014   Web Designer – Penabdul

I designed and maintain the Penabdul website which can be found at http://www.penadul.com

2013   Web Designer – Gunawa Investment Limited

I designed and maintain the organisation website which can be found at http://www.gunawa.com
